

Clinical Excellence Through Telemedicine

Access TeleCare partners with hospitals of all sizes to build and sustain specialty telemedicine programs of excellence.

Built and led by physicians, our team designs Access TeleCare programs to deliver superior patient care.

We deliver consultative telemedicine to on-site health care professionals to allow more patients to be cared for locally – avoiding transfer and fragmented care.

From working in the client hospital's EMR to working as part of the hospital's medical staff, our goal is superior operational integration and clinical excellence for your patients.

We provide dedicated specialists for each hospital to promote an ongoing, collaborative, team-based relationship among patients, physicians, nurses and staff.

Features Include:

- Minimizing length of stay
- Maximizing CMI
- Increasing census
- Optimizing throughput
- Increasing DRG reimbursement

What telemedicine programs can Access TeleCare build for your organization?

Behavioral Health

Neurology

Hospitalist

Infectious Disease

Maternal-Fetal Medicine

Pulmonary & Critical Care

Cardiology

Nephrology

Reliable, Secure Technology in the Service of Patient Care

With an Access TeleCare telemedicine program, hospitals get unparalleled specialty and subspecialty coverage delivered via HITRUST certified technology that supports the patient-provider relationship. The technology prioritizes ease of use, high-reliability, immediate resolution of any maintenance issues and second-to-none uptime.

Clinical Excellence First and Foremost

“The technology has to work quickly, easily and reliably. However, it’s a tool; not the star of the show. The technology is the platform by which we put world-class specialists in your hospital, at your patients’ bedside, 24 hours a day, seven days a week in a fraction of the time of traditional on-call or coverage programs.”

Chris Gallagher, M.D.

Founder and Chief Strategy Officer
Access TeleCare

Technology Features:

- No-click launch
- Sleek, high-resolution display
- HD camera with a remote control for the specialist to pan, tilt and zoom
- Secure, HIPAA-compliant video
- Digital stethoscope
- Antimicrobial coating
- Redundant connectivity
- 24/7 support with a clinical sense of urgency
- Two-year warranty
- Free advance replacement for any defective component

Successes for our client hospitals

“In just one year of telecardiology partnership with Access TeleCare, we have kept more than 100 patients in our hospital, avoiding transfer to remote hospitals and providing integrated, high quality care for our patients right here at home.”

Lynn Falcone

CEO | Cuero Regional Medical Center
