

Access TeleCare provides consistent professional psychiatric coverage for behavioral health consultations 24/7/365 with rapid response times.

With virtual behavioral health you can quickly move psychiatric patients to the next/appropriate care setting preventing unnecessary and costly boarding in your emergency department. Access TeleCare works within your EMR to document and deploy behavioral health services in close collaboration with your care teams.

Access TeleCare expands behavioral health access to meet your emergency department's growing mental health needs with efficient, high-quality care delivery with a dedicated team of providers.

Key Benefits

Rapid response times: Psychiatric consults with guaranteed SLA within 2 hours.

Psychiatric patients tend to wait 3x longer in the ED¹ More than 50% of EDs & general hospitals lack psychiatric services² https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3408670/https://www.mayoclinicproceedings.org/article/s0025-6196(21)00847-8/fulltext

Higher patient throughput: Disposition patients with behavioral health needs quickly and move them to the next/appropriate care setting, opening beds for others who need them.

Increase access to care: More timely access to behavioral health care leads to better health outcomes overall for patients.

Reduce turnover & burnout: Alleviate the burden and stress of 24/7 psychiatric patient care from your on-site staff leveraging Access TeleCare's clinicians.

The leading provider of high quality, cost-effective virtual behavioral health care in healthcare facilities and home settings for over a decade.

Key Features

Access to high-quality clinical network: Access TeleCare has a network of over 400 licensed Psychiatrists, Psychologists, Psychiatric Nurse-Practitioners, and Licensed Clinical Social Workers, who provide evidence-based care for a range of mental health conditions (including depression, anxiety, bipolar disorder, and other SMI conditions) with a specific focus on geriatric mental health care.

Supportive, easy-to-use technology platform: Access TeleCare delivers convenient, remote access on any smart device, including your existing telehealth equipment or we can provide the needed equipment. Hospital staff simply request consultations using the Access TeleCare web portal available 24/7/365 and bring the telehealth cart to the patients.

Adaptive delivery model: We will work closely with your team to design a collaborative care delivery plan that meets the needs of your organization and works within your operational workflows.

Continuous quality improvement: Access TeleCare regularly evaluates the quality of its services and implements best practices to ensure the highest level of care for patients.
