

Bringing Behavioral Health Care Home

Access TeleCare's solution connects patients with the psychiatry and outpatient therapy/counseling they need, right from the comfort of their home.

Access TeleCare Home Health Solution:

Bring timely access to high-quality mental health care in the home with Access TeleCare's virtual behavioral health care services. Access TeleCare's tech-enabled care platform is designed with the needs of home health patients in mind, offering secure, HIPAA-compliant video sessions that can be easily accessed from a computer or mobile device.

KEY BENEFITS

- 
Increase access to care: Cut long wait times of weeks and months down to days and hours.
- 
Reduce barriers to care: Allow patients to access care from the comfort of their homes, without the need to travel to a physical clinic.
- 
Reduce medical costs: Reduce the risk of ED visits and readmissions and improve medication adherence.
- 
Improve patient outcomes: Timely and convenient access to mental health care improves patient outcomes and overall quality of life.
- 
Improve quality of care metrics: Improve HEDIS scores and STAR ratings related to aftercare follow-up, medication adherence, patient satisfaction and readmission rates.
- 
Increase member engagement: Offering virtual behavioral health services can increase member engagement and satisfaction. Members are more likely to choose a plan that offers comprehensive and accessible mental health services.

The Mental Health Crisis is *close to home*:

55% of adults with a mental illness receive no treatment.

28.2% of all adults seeking treatment for a mental illness report an unmet need for care.

The leading provider of high quality, cost-effective virtual behavioral health care in healthcare facilities and home settings for over a decade.

KEY FEATURES

Access to high-quality clinical network: Access TeleCare has a network of over 400 licensed psychiatrists, psychologists, psychiatric nurse practitioners, and licensed clinical social workers, who provide evidence-based care for a range of mental health conditions (including depression, anxiety, bipolar disorder, and other SMI conditions) with a specific focus on geriatric mental health care.

Supportive, easy-to-use technology platform: Access TeleCare delivers convenient, remote access to virtual behavioral health services on any smart device from PCs to tablets and smartphones. Access TeleCare's team calls to schedule and sends a simple text message or email which allows patients to easily join care sessions from the comfort of their home.

Adaptive delivery model: We will work closely with your team to design a collaborative care delivery plan that meets the needs of your organization and works within your operational workflows.

Continuous quality improvement: Access TeleCare regularly evaluates the quality of its services and implements best practices to ensure the highest level of care for patients.
