

# Enhance Patient Care with Consultation-Liaison TelePsychiatry

Professional psychiatric coverage with same day and next day scheduled appointments for behavioral health consultations.

Access TeleCare provides professional psychiatric coverage for medical-surgical and intensive care units with same day and next day scheduled appointments. Our consultation-liaison approach focuses on the diagnosis and management of psychiatric disorders that are comorbid with general medical/surgical illness, enabling a truly comprehensive and patient-centered health care experience. Access TeleCare providers work within your EMR to document and deploy behavioral health services in close collaboration with your care teams. Partner with us to expand behavioral health access to meet your care team’s growing mental health needs with efficient, high-quality care delivery.

Consultation-liaison psychiatry is the “tip-of-the-spear” for psychiatric care.

**Access TeleCare can help you better manage psychiatric disorders that are comorbid with general medical & surgical illnesses.**

## Key Benefits

- 
**Rapid response times:** Psychiatric consults with same/next day scheduled appointments.
- 
**Higher patient throughput:** Stabilize and manage medical patients with behavioral health conditions and prepare them for discharge to the next appropriate care setting.
- 
**Increase access to care:** More timely access to behavioral health care leads to better health outcomes overall for patients.
- 
**Reduce turnover & burnout:** Alleviate the burden and stress of psychiatric patient care from your on-site staff leveraging Access TeleCare’s clinicians.

The leading provider of high quality, cost-effective virtual behavioral health care in healthcare facilities and home settings for over a decade.

## Key Features

-  **Access to high-quality clinical network:** Access TeleCare has a network of over 400 licensed psychiatrists, psychologists, psychiatric nurse practitioners, and licensed clinical social workers, who provide evidence-based care for a range of mental health conditions (including depression, anxiety, bipolar disorder, and other SMI conditions) with a specific focus on geriatric mental health care.
-  **Supportive, easy-to-use technology platform:** Access TeleCare delivers convenient, remote access on any smart device, including your existing telehealth equipment or we can provide the needed equipment. Hospital staff simply schedule consultations using the Access TeleCare web portal and bring the telehealth cart to the patients.
-  **Adaptive delivery model:** We will work closely with your team to design a collaborative care delivery plan that meets the needs of your organization and works within your operational workflows.
-  **Continuous quality improvement:** Access TeleCare regularly evaluates the quality of its services and implements best practices to ensure the highest level of care for patients.
