

Streamlined Outpatient Behavioral Health Care

Access TeleCare's telehealth solution provides professional psychiatric coverage for medication management and talk therapy services in any outpatient setting.

Access TeleCare Outpatient Behavioral Health Solution:

Access TeleCare supports outpatient medical teams with a telehealth solution that connects patients with our professional behavioral health clinicians. We deliver care through a seamless platform for scheduling and performing appointments for psychiatry, medication management, and talk therapy in clinics, or in patients' homes. We enable timely access in the best care setting for your patients and closely collaborate with your care teams to deliver optimal health outcomes. Access TeleCare can become your behavioral health department, or dramatically increase the bandwidth of your existing resources to meet growing needs for outpatient behavioral health.

KEY BENEFITS

Increase access to care: Cut long wait times of weeks and months down to days and hours.

Reduce barriers to care: Patients can attend virtual behavioral health visits right in your clinic's telehealth rooms or from the comfort of home, removing the need to travel.

Reduce medical costs: Reduce the risk of ED visits and readmissions and improve medication adherence.

Improve patient outcomes: Let us handle the behavioral health issues of your patients so your care teams can focus on the other health issues and achieve better health outcomes.

V

Improve quality of care metrics: Improve HEDIS scores and STAR ratings related to aftercare follow-up, medication adherence, patient satisfaction and readmission rates.

Enable Care Teams: Our clinicians will become a part of your team, work directly within your EMR system, collaborate with your care teams, and become a true extension of your care delivery capabilities.

Access

The leading provider of high quality, cost-effective virtual behavioral health care in healthcare facilities and home settings for over a decade.

KEY FEATURES

Access to high-quality clinical network: Access TeleCare has a network of over 400 licensed psychiatrists, psychologists, psychiatric nurse practitioners, and licensed clinical social workers, who provide evidence-based care for a range of mental health conditions (including depression, anxiety, bipolar disorder, and other SMI conditions) with a specific focus on geriatric mental health care.

Supportive, easy-to-use technology platform: Access TeleCare delivers convenient, remote access to virtual behavioral health services on any smart device from PC, to tablet, to smartphone. Access TeleCare's tech-enabled platform allows patients to easily join care sessions from your clinic's telehealth rooms or even from the comfort of the patient's home.

Adaptive delivery model: We will work closely with your team to design a collaborative care delivery plan that meets the needs of your organization and works within your operational workflows.

Continuous quality improvement: Access TeleCare regularly evaluates the quality of its services and implements best practices to ensure the highest level of care for patients.
